Mr. W.D. Gubler  
Maintenance Manager  
Greyhound Lines, Inc.  
200 South Main St.  
Las Vegas, NV 89101

Dear Mr. Gubler:

On September 22, 1986, I received your report regarding the fuel loss of July 6, 1986. In that letter, it was stated that I was satisfied with how the cleanup and repair had been conducted. In fact, I requested a written report be sent to me by Joe's Service Station Maintenance Service regarding this incident. Such a report was never received by this office.

In any event, it is unclear what the fate was of the spilled product. Was any soil removed? Was the tank double lined? Was the spilled product contained in any way? Was any other product encountered?

You should be aware that an investigation is presently ongoing to determine the existence and extent of subsurface contamination in the downtown area. This investigation will likely include the area in and around the downtown station. I am forwarding a copy of this letter to Mr. Doug Zimmerman of this office who is project manager for this investigation.

It is requested that Greyhound respond to the above questions so we may close the file on this incident.

If any questions arise concerning this matter, please contact me.

Sincerely,

Allan Biaggi  
Environmental Specialist  
Waste Management Section
